Consultation Response - giving the sector a voice

The EAUC has now published its response to the proposed repeal by DEFRA of construction Site Waste Management Plans (SWMPs) Regulations.

As a Member-led organisation, the EAUC represents you. We want to ensure your views on topical issues are conveyed to the rest of the sector and to the Government. One important way we can do this is by responding to consultations from the Government and other organisations.

For this consultation, EAUC Members believed that while the regulations are in need of significant improvement, they do help institutions manage, reduce and/or recycle their construction waste – something that would be missing should the regulations be repealed completely.

We would like to thank the many EAUC Members who contributed to the response and, in particular, to Daniel O'Connor at Newcastle University for collating.

Green Gown Awards 2013 - book your place at the most prestigious event of the year!

Following our recent announcement of the Green Gown Award 2013 Finalists, here at the EAUC we are getting very excited about the forthcoming Award Ceremony where the winners will be announced on 12 November. We are particularly excited that this year's black tie event will be hosted by geologist and broadcaster, Professor Iain Stewart MBE.

Described as geology's "rock star," Iain is best known to the public as the presenter of a number of BBC science programmes, including the BAFTA nominated Earth: The Power of the Planet. A Scottish geologist, Fellow of the Geological Society of London and President of the Royal Scottish Geographical Society, Iain is Professor of Geoscience Communication at the University of Plymouth and also a member of the Scientific Board of UNESCO's International Geoscience Programme. He was also recently awarded an MBE in the 2013 Birthday Honours for services to geology and science communication.

New resource: King Edward VI College

King Edward VI College in Nuneaton had targeted its electricity supply as an area where efficiencies could be achieved as part of a broader sustainability programme. An

To help lain celebrate the exceptional sustainability initiatives of the sector, this year's event will take place at The Roundhouse, Derby College – a venue that also holds sustainability at its core and has amassed a string of sustainability awards itself. Built in 1839, The Roundhouse has now been returned to its former glory following a £48 million renovation.

Are you interested in attending an IEMA approved Foundation Course in Environmental Auditing?

A fellow EAUC Member has asked us to organise an IEMA approved Foundation Course in Environmental Auditing. However, before we do so, we would like to know if there are any more Members out there who would also like to attend to make the course viable?

As a five-day course, held within a university or college, this a unique opportunity to attend a sector specific version of this IEMA approved course.

If you are interested in attending, please contact the EAUC at **info@eauc.org.uk**. If enough Members are interested, we will then look to arrange the course for late 2013 or early 2014.

> For more information on the course, view details of a previous event held by the EAUC
> Find out the latest information from IEMA

Sustainable procurement training - National Sustainable Public Procurement Programme supported modules

The Sustainable Procurement Centre of Excellence (SPCE) is pleased to announce that they will be able to further fund the National Sustainable Public Procurement Programme (NSPPP) training on sustainable procurement. This will be offered as a variety of options:

> A half-day workshop for those institutions that only wish to receive the Module 1 Introduction to Sustainable Procurement
> A 1-day workshop to cover Modules 1 to 3
> A 1.5 days workshop to cover Modules 1 to 3 (in greater depth)
> A 1-day workshop covering Modules 2 and 3, for those that have Module 1 or other basic sustainable procurement training

These modules will be available free of charge to institutions for a limited period.

> Find out more or book your place on the SPCE NSPPP training modules

assessment revealed that the College's energy densities were less than the typical benchmark figures for their building category and that as a result their energy use was higher.

The College asked EMSc to demonstrate why the Powerstar voltage optimisation should be chosen to help improve their energy efficiency.

EMSc (UK) Ltd is a Silver EAUC Company Member.

Green Gown awards 2012 - University of Cumbria Carbon Reduction Winner Case Study and Video

'How to eliminate the need for a large pool car fleet'

The University of Cumbria operates from several geographically dispersed sites, the main ones being 70 miles apart. Approximately 70% of our students attend placements as part of their courses.
As a result, the University has a significant culture of business travel by car. Until 2010 this had been provided for by a combination of pool cars and private car use.

This project has been about implementing changes to eliminate or reduce the need to travel and, where travel is needed, to persuade staff to think about alternatives to single occupancy car use. By November 2012 the University had eliminated all of its pool cars (a fleet that in early 2010 numbered 49).
