

Promoting Positive Behaviour: Topic Support Network

Lorimer Room, Old College, University of Edinburgh

Wednesday 11th July, 2012

This topic support network was established in summer 2010 to develop a network of interest in promoting positive behaviour across the HE and FE sector. Achieving long-term changes in the behaviours of individuals is a vital part of sustainable development and we look at how to unlock pro-social and pro-environmental behaviours amongst individuals within institutions. Universities and colleges have a prime opportunity to engage in this area due to the thousands of students that pass through their doors each year.

Agenda

- | | |
|---------------|--|
| 10.00 - 10.15 | Welcome and Introductions
