- Please tick the box of the workshop you would like to attend during the afternoon session

1. Public and Business Sector Investment Opportunities
2. Universities & Colleges Knowledge and Technology Exchange and Partnership
3. Community Engagement/China-Europe Street Gallery Exhibition

Since the 1992 UN Earth Summit in Rio, the EU has taken the lead in implementing the Kyoto Protocol, imperative for the low carbon, clean energy & technology transition, through leader summits and the recent EU-China Mayor's Forum. There is a growing partnership developing at all levels to accelerate awareness and actions for mutual benefit.

China is emerging as the world's major economy and GHG polluter with devastating climate change consequences, at home and internationally. This is compelling a paradigm shift for investment in resource efficiency, smart low carbon cities and communities, together with renewable energy technologies.

China-Europe 2020: Climate Change Challenge is a city/regions and UK initiatives response to their joint agreements, promoting mutual understanding, synergies and partnerships addressing the biggest threat to life on earth.

This will feature:-

.... Knowledge, technology, innovation and investment through co-operation, trade and partnerships for our low carbon sustainable future.
