

Latest developments and news about the CRC scheme:

Disaggregation deadline 30th June: some organisations are having difficulty making their initial registration by the 30th June deadline for disaggregation. If so, please send us an e-mail with "CRC Intent to Disaggregate" in the subject line to CRCHELP@environment-agency.gov.uk confirming your intention to register and disaggregate as soon as possible. We are willing to extend the initial registration window for those wishing to disaggregate until the 31st July. Note that you will still be required to complete registration and disaggregation by 30th September.

Registration concerns and delays: many organisations are delaying their registration due to concerns over how we will handle errors. The earlier an organisation registers with us the more time we have to check and correct any errors. We urge all Participants and Declarers to **register** as soon as possible before the registration deadline of 30th September. For further guidance on how we work with you to resolve errors [more »](#)

CRC Registry: how to change contact details in the Registry after you have registered or made an information disclosure [more »](#)
