Did you know...

Interface has donated the carpet tiles found in the “exchanges” area. They are made from Biosfera

The yarn used in Biosfera is made from industrial waste sources, used fishing nets and fluff from used carpets, separated through processes such as Interface’s ReEntry 2.0 recycling operations

Did you know...

Fishing nets are made of nylon, and are often discarded due to wear and tear. In developing countries, poor artisanal fishermen often dispose of their nets on beaches or in the sea, where they can last for centuries, continuing to catch or injure marine life – a process known as ‘ghost fishing’

Did you know...

Net-Works is working to develop a community-based supply chain for discarded nylon fishing nets that can deliver much of the nylon we need for recycling into our products, while at the same time generating much-needed supplementary income for fishermen who will be able to sell their old nets to Interface
